SPIDER RESISTOR PACKS

PART NUMBER: SSP-OSDP-RESPK

PRODUCT INFORMATION

Spider Resistor Packs – Key Attributes:

- **What's inside?** – A single 120 Ohm Resistor, soldered to Two 22AWG stranded conductor wires.
- **Just The Right Length** – 4 inch wires. Too much slack wastes time.
- **Easy Color Scheme** – Simple Green & White Leads help avoid wiring errors. (Land them over the existing Data Lines color-for-color).
- **Parallel-wire Design** – Makes it easier to tape.
- **Twisted Pairs** – OSDP requires twisted wires.
- **Encapsulation** – Protects the resistor components safely inside.
- **Lifetime Warranty** – Have a bad pack? Just mail us back the bad ones for immediate replacement!

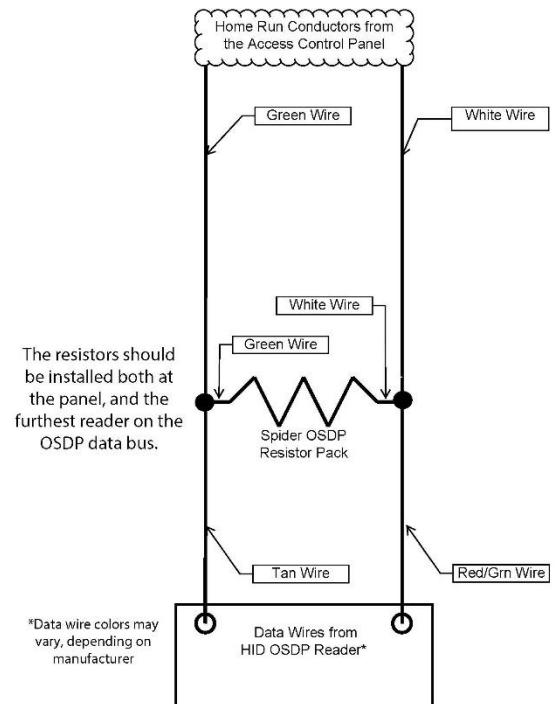

SPECIFICATIONS

Internal Components (Per Resistor Pack):

- (Qty 1) 120 Ohm [Tolerance $\pm 2\%$] 1/4W Resistor
- 22 AWG Stranded Wires
(4" from Shrink Tube to End Tips)

Ratings:

- Maximum Volts: 30VAC/VDC
- Maximum Watts: 7.5W
- Maximum Amps: .25A
