PHYSICAL SECURITY REDEFINED.™

100% Hands Free with Automatic Door Opener: Door Lock Requirements

100% Hands-Free Automatic Door Opener Integration is possible with doors equipped with the following electronic lock types:

- a. Electronic Maglocks
- b. Electronic Shearlocks
- c. Electric Door-frame Strikes
- d. Panic Rim Strikes
- e. Electronic Motorized Latch Pull-back Panic Bars
- f. Electronic Solenoid-based Panic Bars
- g. Motorized Sliding Doors
- h. Contactless Turnstiles
- i. Doors already equipped with an existing & functional ADA Operator (will require some rewiring)

100% Hands-Free Automatic Door Opener Integration is NOT possible with doors equipped with the following electronic lock types:

- a. Electrified Cylindrical Locksets (i.e. Schlage ND80)
- b. Electrified Mortise Locksets (i.e. Schlage L9080)
- c. Or any other locks that require user interaction (e.g. turning a door handle lever), before the door can be allowed to swing open feely

*These are only recommendations, and SSP does not make any guarantees from the suggestions above.

**Please consult with your locksmith/specialty door contractor, for a more proper assessment of your doors applications.
